

Environmental Policy

“We Aerem are committed to the protection of the environment”

We are committed to meeting the requirements of the Resources Management Act 1991, ISO14001:2015, and any other legal obligations towards the protection of the environment.

Activities of specific application to our industry that may require environmental management include.

- Removal and disposal of hazardous substances utilised in our operational activities.
- Prevention of accidental airborne and soil contamination and report requirements.
- Safety Data Sheets Used for all product identification on-site activities; and
- Liaising with affected residents, regional authorities, or landowners.

We are committed to reducing the environmental impact of our activities and continually improving our environmental performance as an integral part of the business strategy and operating methods.

In meeting and commitment, management will:

- Continually improve and monitor environmental performance.
- Continuously improve and reduce environmental impacts.
- Annually review the performance of the Environmental Policy; and
- Always prevent pollution.

In line with our Environmental Policy, we expect our team members to be individually aware of:

- The environmental impact of our operation equipment.
- The usage of materials and avoidance of unnecessary waste.
- The placement of contaminated waste in designated areas;
- The immediate report of any environmental Management Policy.
- Not allowing any hazardous substance to enter the stormwater system or general waste bins.
